Exam : **000-156**

Title : System x Server Family
Technical Support V1

Vendor : IBM

Version : DEMO

NO.1 A customer is asking if the new IBM UEFI recognizes their Windows 2003 Enterprise Operating System. Which of the following is the correct answer?

- A. An upgrade must be done to Windows 2008 Enterprise x64
- B. UEFI can support Windows 2003 Enterprise in native mode
- C. UEFI can emulate BIOS and support Windows 2003 with no performance impact
- D. UEFI only supports Windows 2003 as a virtual machine guest (VMware or Hyper-V)

Answer: C

NO.2 A customer has an existing Cisco network environment, however, they are not standardized on Cisco. They are interested in the IBM Systems Networking switches, but have a concern about managing both vendors. Which of the following addresses that concern?

- A. IBM switches use isCLI
- B. IBM switches cannot intermix with other vendors such as Cisco
- C. The IBM switches can use Element Manager, which is identical to what Cisco uses
- D. Vendors may be intermixed, but with a significant loss of features and functions

Answer: A

NO.3 A customer is looking at the Oracle Times Ten product for an in memory database solution. Which of the following IBM products would be comparable?

- A. solidDB
- B. SAP HANA
- C. SmartCloud Entry
- D. Flex System Manager

Answer: A

NO.4 Which statement is true about Predictive Failure Analysis (PFA) for System x servers?

- A. PFA is available only when a Virtual Media Key is present.
- B. PFA is available only when using the latest service packs.
- C. PFA is available when the related setting is turned on in UEFI settings.
- D. PFA is embedded in selected server components and requires no action to be enabled.

Answer: D

NO.5 A customer is planning for a new large x3850 X5 server installation. Which of the following steps should the technical specialist take to ensure success?

- A. Conduct a TDA
- B. Create an implementation plan
- C. Provide detailed TCO analysis
- D. Engage local FTSS for implementation

Answer: A

NO.6 A client wants to purchase a PureFlex with two Flex Chassis. Which of the following conversations should you have with your client from a logistical perspective before you settle on this configuration?

- A. Who is their preferred local carrier to ensure that carrier delivers the equipment.

- B. Do they want the equipment racked and cabled at the IBM factory before it is shipped to them.
- C. Are they capable of receiving and moving to their datacenter the 42U populated rack that will be shipped.
- D. Do they want to purchase and use an FSM as that will be shipped separately and will be installed on site.

Answer: C

NO.7 A System x customer is considering a Flex System x240 16-core node. The customer needs maximum memory on the node to support their solution. Which of the following is the maximum memory slots available?

- A. 12 slots
- B. 16 slots
- C. 24 slots
- D. 32 slots

Answer: C
