ONLINE TEST ENGINE
Online
Best Practice Material

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

DESKTOP TEST ENGINE
Soft
Best Practice Material

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

PRACTICE PDF
PDF
Best Practice Material

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

ActualVCE respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact ActualVCE.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Try Before Buy

ActualVCE offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Exam : **1Z1-183**

Title : Oracle AI Database
Administration Professional

Vendor : Oracle

Version : DEMO

NO.1 What is the difference between opatch and opatchauto

Response:

- A. opatchauto handles both GI and database patching, while opatch is used for a single Oracle Home
- B. opatch is GUI-based, while opatchauto is command-line only
- C. opatchauto applies interim patches, and opatch applies bundle patches
- D. opatch can patch Grid Infrastructure, but opatchauto cannot

Answer: A

NO.2 How does Oracle Restart enhance availability for single-instance databases?

- A. By automatically applying rolling patches
- B. By restarting database components such as listeners, databases, and ASM automatically after failures or reboots
- C. By managing RAC node failover events
- D. By eliminating the need for ASM

Answer: B

NO.3 What does the srvctl command primarily manage?

- A. Cluster resources like listeners, ASM instances, and services
- B. Automatic Memory Management components
- C. Network topology for standby databases
- D. Optimizer statistics synchronization

Answer: A

NO.4 How does enabling the In-Memory Column Store improve analytic query performance?

- A. By eliminating the need for indexes entirely
- B. By converting tables to columnar format in memory, accelerating scans and aggregations
- C. By automatically converting redo logs into analytical indexes
- D. By storing all tables in row format for faster transactional access

Answer: B

NO.5 How does Oracle Database 23ai enforce security isolation between different PDBs within the same CDB?

- A. By sharing the SYSTEM and SYSAUX tablespaces across all PDBs
- B. By using a separate data dictionary and undo tablespace for each PDB
- C. By ensuring each PDB has its own data dictionary and schemas isolated from others
- D. By automatically encrypting all cross-PDB links without user configuration

Answer: C

NO.6 What differentiates an incremental level 1 cumulative backup from an incremental level 1 differential backup?

- A. Cumulative backups capture changes since the last level 0, differential captures since last level 1
- B. Cumulative backups capture only changed blocks from the last backup, differential captures entire database

- C. Differential backups reset the backup optimization counters, cumulative backups do not
- D. There is no difference; both back up changes since the last level 0 backup

Answer: A

NO.7 How does the CREATE PLUGGABLE DATABASE pdb1 ADMIN USER pdb_admin IDENTIFIED BY password; statement function?

- A. It clones the seed database to create pdb1 with its own administrative user
- B. It creates a new root container with the name pdb1
- C. It converts the current root database into a PDB named pdb1
- D. It generates only metadata for pdb1 without any datafiles

Answer: A

NO.8 Which command ensures that RMAN retains backups long enough for point-in-time recovery?

- A. CONFIGURE CONTROLFILE AUTOBACKUP ON;
- B. CONFIGURE RETENTION POLICY TO REDUNDANCY 1;
- C. CONFIGURE RETENTION POLICY TO RECOVERY WINDOW OF 7 DAYS;
- D. CONFIGURE DEVICE TYPE TO FLASHBACK;

Answer: C
