

ActualVCE

- ✓ 24/7 customer support, Secure shopping site
- ✓ Free One year updates to match real exam scenarios
- ✓ If you failed your exam after buying our products we will refund the full amount back to you.

[Download Demo](#)

ONLINE TEST ENGINE
Online
Best Practice Material

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

DESKTOP TEST ENGINE
Soft
Best Practice Material

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

PRACTICE PDF
PDF
Best Practice Material

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

 **Security & Privacy**
ActualVCE respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

 **Instant Download**
After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact ActualVCE.

 **365 Days Free Updates**
Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

 **Try Before Buy**
ActualVCE offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Believable Exam Dumps Questions grant you ensured success by your first attempt - ActualVCE

Exam : **HP0-S33**

Title : Advanced Integration and
Management of HP Server
Solutions

Vendors : HP

Version : DEMO

NO.1 What can you configure with the BladeSystem Insight Display on a c7000 enclosure? (Select three)

- A. Rack name
- B. Power mode
- C. Number of fans installed
- D. OA1 IP address
- E. Blade name
- F. Midplane serial number

Answer: A,B,D

Reference:

[http://h20000.www2.hp.com/bc/docs/support/SupportManual/c00698534/c00698534.pdf\(page 13\)](http://h20000.www2.hp.com/bc/docs/support/SupportManual/c00698534/c00698534.pdf?page=13)

NO.2 To protect virtual running on multiple ESXi 5.0 hosts, a customer decides to configure a High Availability cluster. What are the requirements for this type of cluster?

- A. The management network must be configured with the Fast Tolerant option enabled.
- B. Enhanced VMotion compatibility mode and Storage DRS must be enabled on the cluster level.
- C. Virtual machine must be stored on the datastore available from each member of the cluster.
- D. The cluster must be configured using Host Profiles.

Answer: C

Explanation:

Requirements for a VMware HA Cluster Review this list before setting up a VMware HA cluster. For more information, follow the appropriate cross reference or see Creating a VMware HA Cluster.

All hosts must be licensed for VMware HA. You need at least two hosts in the cluster. All hosts need a unique host name. All hosts need to be configured with static IP addresses. If you are using DHCP, you must ensure that the address for each host persists across reboots. All hosts must have access to the same management networks. There must be at least one management network in common among all hosts and best practice is to have at least two. Management networks differ depending on the version of host you are using. ESX hosts - service console network. ESXi hosts earlier than version 4.0 - VMkernel network. ESXi hosts version 4.0 and later - VMkernel network with the Management Network checkbox enabled.

See Networking Best Practices. To ensure that any virtual machine can run on any host in the cluster, all hosts should have access to the same virtual machine networks and datastores. Similarly, virtual machines must be located on shared, not local, storage otherwise they cannot be failed over in the case of a host failure. For VM Monitoring to work, VMware tools must be installed. See VM and Application Monitoring. All hosts in a VMware HA cluster must have DNS configured so that the short host name (without the domain suffix) of any host in the cluster can be resolved to the appropriate IP address from any other host in the cluster. Otherwise, the Configuring HA task could fail. If you add the host using the IP address, also enable reverse DNS lookup (the IP address should be resolvable to the short host name).

NO.3 Which host is selected as a master host in the VMware HA cluster?

- A. The host with access to the greatest number of the datastores
- B. The host with the redundancy configured for management network
- C. The host with the greatest number of virtual machines configured with fault tolerance

D. The host with the greatest CPU and memory capacity

Answer: A

Explanation:

http://pubs.vmware.com/vsphere50/index.jsp?topic=%2Fcom.vmware.vsphere.avail.doc_50%2FGUIDB9ACCE9B-A14D-4B2F87EF-4B0A67ABDF58.html

When you add a host to a vSphere HA cluster, an agent is uploaded to the host and configured to communicate with other agents in the cluster. Each host in the cluster functions as a master host or a slave host. When vSphere HA is enabled for a cluster, all active hosts (those not in standby or maintenance mode, or not disconnected) participate in an election to choose the cluster's master host. The host that mounts the greatest number of datastores has an advantage in the election. Only one master host exists per cluster and all other hosts are slave hosts. If the master host fails, is shut down, or is removed from the cluster a new election is held.

NO.4 You want to create a service template using I/O Designer that will be deployed to the Hyper-V host. Currently, only VMware templates have been used in this environment.

How must you prepare a virtual machine template to use for this template?

- A. Use the Insight Control Server migration functionality to migrate the VM from VMware to Hyper-V and then use the vCenter server to prepare the template recognized by I/O.
- B. You can use VMware templates for Hyper-V deployment since I/O is virtualization layer independent.
- C. Use the I/O converter tool to convert the VMware template to change it to the correct format.
- D. Create a virtual machine template using Insight Control virtual machine management functionality.

Answer: D

NO.5 A customer complained of slow performance on an HP ProLiant server. You upgraded to faster processes and added memory to the server. What should you create after you change the server hardware configuration?

- A. New performance baseline
- B. Insight Diagnostics report
- C. CPU Stress report
- D. Memory Validation report

Answer: A

NO.6 You are experiencing problems with a Virtual Connect domain and want to verify the domain status. Which tool can you use to perform a domain health check?

- A. Service Pack for ProLiant
- B. Active System Health Log
- C. Virtual Connect Active Health
- D. Virtual Connect Support Utility

Answer: D

Reference:

<http://bizsupport.austin.hp.com/bc/docs/support/SupportManual/c01566977/c01566977.pdf> (page 17, see step 2)

Step 2-Run a health check on the Virtual Connect domain

1. From a local system with VCSU installed, execute the following command:

```
vcutil -a healthcheck -i <Primary OA IP> -u <OA Admin account> -p <OA password>
```

NO.7 A customer is running HP SIM in a headquarters that has three branch offices with multiple server blades managed by the HP SIM in a central location. Version Control Repository Manager is configured in all branch offices, but all deployment tasks should be performed from the central location. What must you configure first?

- A. all remote VCRMs properly licensed
- B. Secure tunnel between headquarters and the branch offices
- C. Additional CMS server in the branch offices that will not perform any management function and will work as a federated CMS and give access to the local VCRM
- D. Trust relationship between HP SIM and the machines running VCRM in remote locations

Answer: D

NO.8 When developing an implementation Plan, what does the acceptance criteria establish?

- A. Exit criteria for transacting the system into production
- B. Minimum level of performance required for plan continuation
- C. Authorization to continue toward funding of the project
- D. Authorization to start or implement the project plan

Answer: C

NO.9 A customer needs a direct attached based storage for a BladeSystem and wants a solution that enables low cost zoned or shared storage.

Which type of HP external storage meets the customer requirements?

- A. Direct Connect SAS storage
- B. Infiniband
- C. Fibre Channel over Ethernet
- D. Serial Attached SCSI

Answer: A

Explanation:

http://h18006.www1.hp.com/products/storageworks/sas_solution/index.html (Overview, first para)

With the direct connect SAS storage for HP BladeSystem, HP extends and redefines direct-attached storage for BladeSystem servers. Now you can build local server storage on the fly with zoned storage, or enable low cost shared storage within the rack

NO.10 Which Windows performance counter can be used to check for a Smart Array disk bottleneck problem?

- A. Logical Disk: Average Disk Queue Length
- B. Physical Disk: Average Disk Queue length
- C. Logical Disk: Average Disk Write Queue Length
- D. Physical Disk: Average Disk Write Queue Length

Answer: B
